CHAIRMAN'S MESSAGE

At Shiv Shakti Fibre Udyog, our journey over the last 25 years has been one of innovation, resilience, and relentless pursuit of excellence. Under the brand Rooffit, we have consistently delivered top-quality Pre-Engineered Buildings (PEB) and Roofing & Cladding solutions, earning the trust of industry leaders across sectors.

Our commitment to superior engineering, client-centric customization, and on-time execution has made us a preferred partner in complex infrastructure projects. As India scales new heights in industrial growth and global integration, we at Rooffit remain dedicated to empowering our clients with reliable, sustainable, and cost-effective solutions—designed for today, and engineered for tomorrow.

On a personal note, I've always believed that the true strength of any company lies in its people and the relationships it nurtures. Every project we deliver is a reflection of not just our technical capability but our shared trust and vision with our clients. As we step into the next phase of our growth, I remain committed to listening, learning, and leading with humility and purpose.

Warm regards.

Vinay Bansal

Chairman & Partner

Shiv Shakti Fibre Udyog (Rooffit)

About Us

Shiv Shakti Fibre Udyog, operating under the brand name Rooffit, is a name synonymous with excellence, innovation, and reliability in the field of Pre-Engineered Buildings (PEB) and Roofing & Cladding Solutions. With an illustrious legacy spanning over 25 years, we have grown from a small manufacturing unit to one of India's most respected and trusted infrastructure solution providers.

We take immense pride in being India's first company to install a Fully Automated Continuous Machine for manufacturing FRP Sheets, revolutionizing the quality and consistency of FRP production in the country. This pioneering move not only set a new benchmark in the industry but also earned us the prestigious Bureau of Indian Standards (BIS) certification—making Rooffit the only Indian brand licensed for FRP/GRP sheets under BIS.

Our expertise lies in complete turnkey execution, from engineering and design to manufacturing, supply, and installation. Backed by a state-of-the-art facility and a highly experienced engineering and project execution team, Rooffit has successfully delivered a wide array of projects for refineries, power plants, chemical factories, cooling towers, industrial sheds, warehouses, and cold storages. We have proudly supplied to major clients such as IOCL, BPCL, HPCL, EIL, L&T, PDIL, HRRL, NTPC, and several leading EPCs across India and abroad.

Our strength lies in our unwavering focus on quality, deep technical know-how, and the ability to customize solutions to meet the unique needs of every client. Over the years, our commitment to delivery timelines, transparent communication, and zero-compromise on safety has earned us the loyalty of over 300 corporate clients, many of whom have continued to partner with us for over a decade.

Shiv Shakti Fibre Udyog is not just a manufacturing company—it's a dependable partner in building India's industrial future. We are proud of our legacy and equally excited for what lies ahead as we continue to deliver excellence, one project at a time.

Let's construct the future, together!

Complete Product Range

- **Pre-engineered Metal Building Systems (PEB)**
- **Roofing and Cladding**
 - Hi-Rib/ Standing seam/ Klip lock Profiles
 - Metal Decking Sheets (with accessories)
- **Z and C Cold Formed Sections**
- **FRP and Polycarbonate Products - (Machine Made Sheets)**
 - FRP Chemical Resistant Sheets
 - FRP/ GRP Roofing Sheets - Any Profile & Length (As per ISO 12866, CPWD, SOR-Railways)
 - Polycarbonate Sheets - Compact, Embossed, Multi-Wall
 - FRP Gutter
 - FRP Grating & Cable Tray
 - FRP Doors & Frames (IS-14856)
- **PUF Insulated Panels**
- **Accessories**
 - Turbo Ventilators (In metal, FRP, and PC)
 - Ridge Vent
 - Louvers - Metal, FRP, PC

Complete Machine Range

Fabrications Machines

- Automatic H-Beam Welding Line (PTW)
- CNC Plasma Cutting Machine
- Radial CNC Drilling Machine
- Magnetic Drilling Machine
- Iron Worker
- Chaser
- Hydraulic Power Press
- Shearing and Bending Machine
- Mig Welding Machine
- Arc Welding Machine
- Sand Blasting/ Copper Blasting Machine
- Air Spray Painting Machine

Cold Formed Machine

- Z&C Purlin Machine

Roofing and Machines

- Hi-RIB Roofing Machine
- Klip-Lok Forming Machine
- Standing Seam Forming Machine
- Metal Decking Forming Machine
- Hi-RIB Roofing and Cladding Crimping Machine (For curved sheets)

• Continuous Laminating Fully Automatic FRP Sheet Machine

• PUF Insulated Sandwich Panel Machine

Pre-Engineered Buildings – The Future Of Construction

Manufacturing

- **Factory Location** - Rohtak, Haryana
- **Factory Production** - The production capacity of Built-Up / Cold-Forming / Sheets and Accessories is 45000 metric tons per annum

Machines

CNC Plasma Cutting Machine

Automatic H-Beam Welding Line

Shearing Machine

Standing Seam Machine

Iron Worker

Pre-Engineered Buildings – The Future Of Construction

Design Strength

- Bureau of Indian Standards IS-800, IS-801, IS-875 & IS-1893(BIS)
- American Iron and Steel Institute (AISI)
- American Institute of Steel Construction (AISC)
- Metal Building Manufacturers Association (MBMA)

Softwares Used :

STAAD.Pro

AUTODESK

Quality, Safety & Project Management

- Conduct regular job site safety inspections
- Implement health monitoring for workers
- Designate a qualified safety engineer to coordinate safety efforts
- Develop safety plans for each job and task
- Provide ongoing safety training to workers
- Strictly adhere to safety procedures
- Continuously improve safety protocols based on feedback

PEB Components

Crane Systems

Various types of cranes being used in industry for various purposes.

- EOT overhead crane with a pendant or cabin-operated
- Overhung/ under-slung crane system
- Monorail crane or house system
- Wall-mounted crane
- Jib crane

Wall-Mounted Crane

Overhead Crane

Monorail Crane

Jib Crane

Mezzanine Systems

Intermediate mezzanine floors are possible in metal buildings. Mezzanine floors can be provided in complete or partial areas in pre-engineered buildings to suit loading requirements for office and storage.

Mezaanine System

Mezaanine System

- Dimensional & Visual Checking
- Ultrasonic Testing
- Utilized to detect internal flaws or defects in materials using high-frequency sound waves.
- Digital Thickness Gauge
- Radiographic Test (on request)
- Dry Penetration Test
- Dry Film Thickness
- Digital Vernier Caliper 6"/12"
- Universal Testing Machine
- Electrometer

- Focus on core business
- Operational Cost Reduction
- Releasing Internal Capabilities
- Better Turn Around Time
- Greater Control
- Rising Efficiency
- Process Optimization
- Structured Reporting

FRP And Polycarbonate Products

Advanced Composite Solutions by Rooffit

At Rooffit, we specialize in high-performance FRP (Fiberglass Reinforced Plastic) and Polycarbonate Sheets, designed to meet the evolving needs of industrial, commercial, and residential applications. FRP, also known as GRP (Glass Fibre Reinforced Plastic), is a composite material made by reinforcing fiberglass in a matrix of unsaturated polyester resin, making it lightweight, durable, and highly resistant to environmental factors.

Innovative FRP Sheets with Anti-Aging Technology.

Rooffit's machine-made FRP Sheets are manufactured with an Anti-Aging Film, embedded during production, ensuring enhanced durability and protection against UV radiation, extreme weather, and abrasion. This advanced feature extends the lifespan of FRP sheets by an additional 5-7 years, making them a cost-effective and sustainable choice.

Range of FRP Sheets by Rooffit

- **Plain Sheets** – Smooth-surfaced sheets for versatile applications
- **Crinkle / Textured Sheets** – Enhanced aesthetic appeal & durability
- **Corrugated Sheets** – Ideal for industrial and residential roofing
- **Industrial Trapezoidal Profile Sheets** – High-strength sheets for warehouses & factories
- **Curved Profile Sheets** – Custom-curved sheets for architectural designs

Features

- **Length** : Any transportable length from 5 - 40 feet or more
- **Width** : Max. 1500 mm Plain width and 1250 mm Profiled width
- **Thickness** : 0.6 mm to 4.0 mm (Uniform thickness in Machine Made sheets)
- **Light Transmission** : 80-85% max
- **Color** : Any translucent or opaque colors

Why Choose Rooffit FRP & Polycarbonate Products?

- **High Strength-to-Weight Ratio** – Lightweight yet structurally strong
- **Superior Weather Resistance** – Protection against extreme heat, cold, and humidity
- **UV Protection** – Anti-aging film enhances sheet life & prevents discoloration
- **Corrosion & Chemical Resistant** – Ideal for industrial environments
- **Customizable Options** – Available in multiple profiles, thicknesses, and colors

Applications

- Chemical Plants – Roofing/ partition/ side cladding /paneling
- Covering & Casing of Cooling Towers
- Warehouses/ Industrial Roofing
- Skylights – Industrial / Domestic
- Industrial Sheds with mild Corrosive Fumes
- Water Treatment Plants
- Sidewall Cladding
- North Light Glazing
- Parking Areas/ Walk Ways
- Marine Projects or Industrial Sheds near Coastal Areas
- Garages / Verandah /Porches
- Stadium / Swimming Pool/ Railway Station

Advantages

- **Durability:** 15-20 years warranty
- **No Wastage:** Uniform thickness
- **Freedom to select color, profile & any transportable length**
- **Flexibility in Sizes and Thickness**
- **Matching Profiles**
- **Provides Day Light**
- **Weather Resistant**
- **Translucent**
- **Fire Retardant**
- **Unbreakable**
- **Light Weight**

Rooffit Translucent FRP Sheets

Precision Engineered for Performance

Rooffit's Machine-made FRP Sheets are manufactured using the most advanced State-of-the-Art Continuous Automatic Production Line, ensuring high transparency, superior durability, and unmatched quality. Designed for industrial and commercial applications, these single-molded continuous sheets offer a smooth glossy finish or embossed texture, with an inbuilt UV-stabilized coating to protect against harmful UV rays and color fading.

Available in any color of your choice, Rooffit FRP Translucent Sheets are produced in thicknesses ranging from 0.6 mm to 4.0 mm, catering to various structural needs. These weather-resistant, lightweight, and high-strength sheets are widely used in industrial sheds, warehouses, skylights, and daylight roofing solutions. Offering exceptional light transmission, they help create energy-efficient workspaces while maintaining structural integrity and longevity.

With Rooffit FRP Sheets, you get precision, strength, and aesthetics—a perfect combination for modern construction requirements.

Translucent FRP Sheet

Rooffit Opaque FRP Sheets

Durable, Corrosion-Resistant & Energy Efficient

Rooffit's Opaque FRP Panels are engineered for superior performance in challenging environments, making them ideal for Cooling Towers, Water Treatment Plants, Industrial Roofing & Cladding. These sheets are highly resistant to corrosion, especially in coastal areas, acidic fumes, saltwater exposure, and industrial environments, ensuring long-term durability without degradation.

Designed as a perfect alternative to metal sheets, Rooffit's lightweight and easy-to-install FRP Opaque Panels offer zero light transmission, exceptional weather resistance, and color stability. Their high thermal efficiency helps regulate indoor temperatures, creating cooler and more comfortable working conditions while enhancing energy efficiency.

Built to withstand harsh weather conditions, UV exposure, and mildly corrosive environments, Rooffit Opaque FRP Sheets deliver aesthetic appeal, durability, and functionality, making them the preferred choice for industrial and commercial applications.

Opaque FRP Sheet

Rooffit Gel-Coated Chemical Resistant FRP Sheets

Superior Protection & Durability

Rooffit's Gel-Coated FRP Sheets are designed to provide exceptional durability, UV resistance, and chemical protection for industrial and commercial applications. The gel coat acts as a protective top or bottom layer on FRP/GRP opaque panels, enhancing surface strength and preventing abrasion, erosion, and weathering.

These sheets are highly resistant to moisture, humidity, and chemical exposure, making them ideal for harsh industrial environments. Additionally, their anti-fungal and anti-bacterial properties ensure clean and hygienic conditions, making them suitable for healthcare, food processing, and clean-room applications.

Applications of Rooffit Gel-Coated FRP Sheets

- Roofing & Cladding for Chemical Industries
- Electroplating Plants
- Zinc & Aluminium Alloy Manufacturing Units
- Effluent & Wastewater Treatment Plants
- Refrigerated Vans, Truck & Bus Bodies
- Fertilizer Industry
- Water Treatment Plants

With high impact resistance, easy maintenance, and long-lasting performance, Rooffit's Gel-Coated FRP Sheets are the ultimate solution for industries demanding chemical resistance, hygiene, and durability.

Rooffit FRP Gutters

Durable, Corrosion-Resistant & Maintenance-Free

Rooffit's FRP Gutters are designed to provide efficient and long-lasting water drainage solutions for industrial and commercial structures. Manufactured in customized shapes, sizes, and lengths, these gutters come with accessories like down-take sockets, end covers, junction boxes, and cross-joints to ensure a seamless installation.

Duly installed on MS brackets or support members made of MS angles/flats, Rooffit FRP Rainwater Gutters offers a high load-bearing capacity of 300-500 kg per square meter, ensuring superior strength and reliability.

Key Advantages of Rooffit FRP Gutters

- Single Casted with No Joints – Prevents leakage and enhances durability
- Maintenance-Free – Requires no frequent repairs or replacements
- Extremely Long Life – Built to withstand harsh environmental conditions
- Resistant to Weathering & UV Exposure – Retains structural integrity over time
- Corrosion Resistant – Ideal for industries prone to chemical exposure and moisture
- Ease of Handling & Installation – Lightweight and easy to fix, reducing labor costs

With Rooffit's FRP Gutters, experience a cost-effective, high-performance, and sustainable drainage solution for your industrial needs.

Rooffit Turbo Ventilators

Efficient, Eco-Friendly & Maintenance-Free Ventilation Solutions

Rooffit is a trusted manufacturer of Wind-Driven Industrial Turbo Ventilators with a matching FRP base plate, ensuring seamless installation across various site conditions. Designed for maximum exhaust efficiency, Rooffit Turbo Ventilators provide continuous air circulation while preventing the ingress of rain and dust, creating a healthier and more comfortable work environment.

Key Features & Advantages

- Maintenance-Free & Easy to Install – Hassle-free setup with no operational costs
- Eco-Friendly & Energy Efficient – Wind-driven; requires no electricity
- Silent Operation – Noiseless performance for a better workplace environment
- Year-Round Fresh Air – Ensures 24x365 days of uniform ventilation
- Removes Hot, Humid & Polluted Air – Enhances worker productivity & safety
- Rust-Resistant & Durable – Made from Aluminum & Stainless Steel
- Technically Designed for Extreme Conditions – Withstands cyclones, storms & high winds
- Fits on Any Roof Surface & Gradient – Adaptable for industrial, commercial & residential structures
- Fast Payback Period – Significant savings due to zero power consumption

Applications

- Industries: Automobile, Chemical, Pharmaceutical, Engineering, Foundry
- Commercial Buildings: Warehouses, Public Halls, Restaurants, Offices
- Residential Spaces: Ensures proper airflow in houses & apartments
- High Heat Areas: Boiler Houses, Generation Houses, Textile Processing Units
- Food Industry: Improves hygiene by eliminating stale air and fumes

With Rooffit Turbo Ventilators, experience a cost-effective, sustainable, and high-performance ventilation solution for all your industrial and commercial needs.

Rooffit FRP Gratings

Lightweight, Durable & Corrosion-Resistant Flooring Solutions

Rooffit offers high-performance FRP Gratings that surpass traditional materials like Metal, PVC, and RCC by providing superior impact resistance, corrosion resistance, and electrical insulation. With a strength-to-weight ratio only one-fourth of that of steel, Rooffit FRP Gratings are easy to handle, cut, install, and can be fully customized to meet diverse industrial and commercial applications.

Why Choose Rooffit FRP Gratings?

- Lightweight & High Strength – Exceptional strength-to-weight ratio compared to steel
- Corrosion & Chemical Resistance – Ideal for harsh industrial environments
- Non-Conductive & Fire Retardant – Enhances workplace safety
- UV-Stabilized & Weather-Resistant – Long-lasting performance in extreme conditions
- Anti-Skid Surface – Ensures safety in wet and oily environments
- Minimal Maintenance & Cost-Effective – Virtually maintenance-free, reducing long-term costs

Types of Rooffit FRP Gratings?

- Molded FRP Gratings - Excellent insulation properties with high impact resistance
- Pultruded FRP Gratings - Offers superior mechanical strength & chemical resistant

Applications of Rooffit FRP Gratings?

- Industrial Flooring – Slip-resistant surface for high-traffic areas
- Trench & Drain Covers – Strong & corrosion-resistant for drainage solutions
- Platforms & Walkways – Safe, durable, and easy-to-install structures
- Electrical Cable Trays – Insulated for enhanced safety
- Stairways, Handrails & Ladders – Ideal for industrial and commercial settings
- FRP Cross Arms for Electric Applications – Non-conductive and weather-resistant
- Chemical Pipelines & Load-Bearing Structures – Robust and long-lasting support

With Rooffit FRP Gratings, you get a cost-effective, maintenance-free, and high-strength solution, ensuring superior performance and safety in even the toughest conditions.

Rooffit FRP Doors

Durable, Corrosion-Resistant & Maintenance-Free

Rooffit FRP Doors are designed to offer high durability, superior strength, and excellent resistance to moisture, chemicals, and harsh weather conditions. Manufactured using state-of-the-art technology, these doors provide a seamless, single-casted construction that ensures long-lasting performance with minimal maintenance.

Types of Rooffit FRP Doors:

- FRP Door Shutter – Panel Type
- FRP Door Shutter – Flush Type
- FRP Door Frame

Applications of Rooffit FRP Doors

- Residential & Commercial Buildings – Ideal for toilets, bathrooms, kitchens, mummy & internal doors
- Factories & Warehouses – Resistant to chemical exposure & harsh environments
- Schools & Institutions – Strong, secure, and long-lasting

Advantages of Rooffit FRP Doors & Shutters

- Single-Casted with No Joints – Ensures structural integrity & durability
- Maintenance-Free & Long Life – No need for frequent repairs or replacements
- Weather & UV Resistant – UV-stabilized for long-term exposure to sunlight
- Corrosion-Resistant – Excellent water and chemical resistance
- Lightweight & Easy to Handle – Tough, scratch-proof, and effortless to install
- Quick & Easy Installation – Inbuilt hinge slots & inserts allow simple installation by any carpenter
- Ease of Repair – Any damage can be repaired on-site without visible marks
- Electrical & Thermal Insulation – Ideal for energy efficiency and safety
- Aesthetic Appeal & Strength – Termite-proof, waterproof, and fire-retardant

With Rooffit FRP Doors, you get a cost-effective, durable, and stylish door solution that is perfect for residential, industrial, and commercial applications.

Rooffit Polycarbonate Sheets

Superior Strength, Light Transmission & Durability

Rooffit Polycarbonate Sheets are the ideal choice for roof glazing and cladding applications, offering exceptional durability, high impact resistance, and excellent light transmission. These sheets are widely used across industrial, commercial, domestic, and government projects for skylights, roofing, canopies, partitions, and more.

Types of Rooffit Polycarbonate Sheets:

- Transparent Plain Compact Sheets – Clear, strong, and impact-resistant
- Transparent Plain Embossed Sheets – Textured for aesthetics and light diffusion
- Multi-Wall Sheets – Lightweight with superior insulation properties

Standard Dimensions & Colors

- Thickness Range: 1.5mm to 20mm
- Colors Available: Clear, Opal White, Grey, Blue, Bronze, Green
- Custom Profiles Available to match project-specific requirements

Applications of Rooffit Polycarbonate Sheets

- Industrial Roofing & Skylights – Ideal for warehouses & factories
- Stadiums & Public Spaces – Durable and weather-resistant
- Parking Areas & Garages – Provides shade & protection
- Verandahs, Porches & Walkways – Enhances aesthetics & functionality
- Partition & Window Glazing – Offers transparency & strength
- Domes & Canopies – Creates stunning architectural features

With Rooffit Polycarbonate Sheets, you get a high-performance, cost-effective roofing and glazing solution designed for strength, flexibility, and long-term durability.

Metal Roofing and Cladding

At Rooffit, we manufacture high-performance metal roofing and cladding solutions designed to withstand extreme weather conditions while offering superior durability and aesthetics.

Types of Rooffit Metal Roofing Sheets:

- Pre-Painted Galvanized Steel Sheets (PPGI)
- Pre-Painted Galvalume Steel Sheets (PPGL)
- Bare Galvalume Sheets (Without Color)

Key Features:

- High strength-to-weight ratio for durability
- Withstands wind speeds of up to 200 kmph
- Excellent corrosion resistance and low maintenance
- Custom color shades available as per RAL standards
- Superior coverage & energy-efficient roofing solutions

Klip Lok Profile

Klip Lok Profile is a strong, durable, versatile, and long-length âroof. It combines the strength of steel with smart fluted pans and a lock-action rib design. Even for roof pitches as low as 20 where no ends laps are used, the interlocking ribs, together with concealed fastening, ensure weather resistance. It is designed particularly for low-pitch roof application. Klip Lok Profile is a screwless roof with unmatched performance.

Standing Seam

Standing seam metal roofing is a concealed fixed roof system which features vertical ribs with a flat space or pan in between. The side edges of one roof panel are zipped or seamed along the length with the adjoining roof panels. The roof panels are attached to the purlins or secondary members with specially designed clips or clamps. The concealed fix system requires no piercing fasteners and helps provide weather tightness and superior resistance to wind uplift.

Decking

STEEL DECKING SHEET

Our range of steel decking profiles made out of Plain Cold Rolled (CR) steel, Galvanized Steel (GP), and Colour Coated Steel (CCS) with yield strength ranging between 240 to 550 Mpa.

Details of Base Material

- Cold Rolled Steel - As per IS 513
- Galvanized Steel - As per IS 277 (120 to 450 Gsm)
- Colour Coated Steel - As per IS 14246-95

Advantages

- It will reduce the shuttering time and cost.
- It will enable fast construction of building roofs and floors, thereby saving up to 50% of construction time of the slab and roof.
- Once designed as composite structural, it will allow either to reduce or to eliminate the structural steel used in RCC slabs.
- Internal plastering of roofs can be eliminated because steel roof decking gives aesthetic look internally also.

Product Applications

- Rooffit Roof Decking range offers a variety of metal thickness (0.80 mm to 1.20 mm) profile and finish to meet differing requirements regarding span, insulation, water proofing, imposed load, and any other considerations.
- It can be used as a permanent structural support member for slab.

Crimp Profile Sheet

Metal Profile Sheets are available in round (Concave/Convex) curved sheets to match the structural design giving architectural features to the building. The span (radius) are as per your requirement down to minimum recommendation of 500 mm.

C & Z Purlin

'Z' & 'C' Purlins are structural members designed and produced using the advanced technology, quality and customer oriented services, for use as secondary supports for economical roof sheeting and wall cladding systems in any type of building with following added advantages:

- Continuous splay or splicing for better structural strength, stability & economy
- 45° Lip for better sectional modulus and easy nesting. These are supplied in required length with pre-punched holes for quick bolting. The system gives an excellent strength to weight ratio with flexibility for specific size requirement.

PUF Panels

PUF-insulated panels are manufactured and sandwiched between color-coated steel sheets on top and bottom. The Panels are available in various colors and total thickness of panel range from 30 mm to 100 mm. The PUF Panels are ready-to-install and self supporting with high overall stiffness.

Advantages & Essential Features

- Very high thermal insulation – Superb thermal efficiency & rigidity.
- Inner and outer skin in Pre-coated GI / Galvalume / FRP Sheets are resistant to extremes of Weather & corrosion.
- For Roofing & Cladding provision of specially designed tongue and groove joints to ensure water leak proof & airtight joints.
- Withstand against storm, heavy rainfall, wind.
- Sturdy enough for temperature (-4°C to -50°C).
- Fire retardant and Self extinguishing.

Applications

- Industrial Building & Sheds
- Telecom Shelters
- Cold Storage & rooms.
- Pre-fabricated Shelters / Defense Shelters.

Subject: VENDOR REGISTRATION CERTIFICATE

Dear Sirs,

We are pleased to inform you that we have entered with PDI, as an approved vendor for the last 10 years for paper & steel.

ITEM CODE	MATERIAL/RANGE
ITEM CODE ITEM DESCRIPTION ITEM CODE ITEM DESCRIPTION	MATERIAL/RANGE

WE REQUEST REPLY PDI, KARNATAKA AND MYSORE SHEET PRODUCTS.

This instrument is valid for your facility at:
 PDI, NO. 1, TIRTH P, VILLAGE, HASANPUR, TIRHUT, SONBHA, DISTT - ROHTAK,
 HARYANA, INDIA.

Please refer the above reference number in all your future communications related to above subject.
 We hereby state that this instrument is subject to satisfactory execution of orders in delivery and quality of above mentioned items when ordered for our regular orders.

Further it may be noted that any change in the product range, location of factory & sales office, Management/Organizational structure etc. shall be intimated to us immediately along with relevant documents for our reference only. In case, if notified by any of the above mentioned changes in our instrument only, the instrument shall not be liable to be cancelled. Your performance shall be reviewed for continuation of your instrument with PDI. Cancellation with PDI, shall not guarantee any regular flow of enquiries.

This registration is valid till 30-06-2025. You shall require us at least 100 days in advance for extension if you require valid one, stating which your name may be listed from our website too.

Thanking You,

 (PDI, Gurgaon)
